REACT

DURACIÓN

25 horas

CONTENIDOS

COMPONENTS

▶ Learn how to render list and form components efficiently in React, and learn how to lift a shared state up when several components need the updated data.

REACT HOOKS AND CUSTOM HOOKS

▶ Learn to use all the common hooks in React, and how to put them to use within your application. Then, build your own custom hooks.

JSX AND TESTING

▶ Understand JSX in depth and discover advanced patterns to encapsulate common behaviour via higher-order components and render props. Then, learn how to test and debug your application.

FINAL PROJECT

▶ In this module, you will be assessed on the key skills covered in the course and create a project to add to your portfolio.
